

# Karin Dahlman-Wright, PhD

## Vice-President

---

**Professor Karin Dahlman-Wright** has been Vice-President of Karolinska Institutet (KI) since January 2016. Professor Dahlman-Wright earned her doctoral degree at KI in 1991 and was appointed Professor of Molecular Endocrinology in 2009. She was named acting President in February 2016, a position she held until July 2017.

Professor Dahlman-Wright has previously served as head of Karolinska Institutet's Department of Biosciences and Nutrition (2009-2015). Between 2013-2015 she served as KI's scientific director of the Science for Life Laboratory (SciLifeLab), where she was a member of the operative management team responsible for its national platforms. Professor Dahlman-Wright was Karolinska Institutet's deputy dean for infrastructure throughout 2015. Earlier in her career, Professor Dahlman-Wright held key positions within line and project management at Pharmacia and Upjohn (1994-2000). Upon returning to KI in 2000, she launched Karolinska Institutet's core facility for bioinformatics and expression analysis, which provides advanced services in genomics and bioinformatics.

In recent years, her research has focused on the molecular mechanisms of estrogen signaling in metabolic disease and breast cancer using functional genomics technologies. She is also active in Karolinska Institutet's strategic diabetes research initiative, which translates clinical and basic research results into improved diabetes care and treatment.

Professor Dahlman-Wright has served on numerous scientific and advisory boards and panels on behalf of SciLifeLab, the European spallation resource reference group, Stockholm Science City and the Swedish and Norwegian research councils, among others. She is elected chairman of Karolinska Institutet Holding AB.
