

Dear all,

Here is my monthly letter as a delegate for the Environment and Sustainable development at Onc-Pat with information on up-coming events!

As a KI researcher, you could apply for research grants specifically devoted to address Sustainable Developmental Goals, SDGs summarized by Agenda 2030 [Call: Junior Investigator Award for projects at KI aimed at achieving the SDGs | Karolinska Institutet Nyheter](#)

To gain an insight on what kind of research you could apply for, register for on-line workshops on 22 and 25 of November [Workshop: KI grants for SDG-related research | Karolinska Institutet Nyheter](#)

## 2<sup>ND</sup> KI CONFERENCE ON SUSTAINABLE DEVELOPMENT

[2nd KI Conference on Sustainable Development | Karolinska Institutet Nyheter](#) This year the theme is "From basic science to better health for all – making innovations reach the ones in need". It is a HYBRID event, you need to register for either on-line or live. In latter case, there will be some refreshments and a POSTER session.

- Learn how KI researchers address the SDGs' challenges in their research
- Learn how basic science and innovative techniques contribute to Sustainable development

## SOME READING

Bill Gates "How to avoid climate catastrophe". You can now borrow this book from me (return after 1 month). You can also purchase it in Swedish, for example, on Bookis following this link [Så undviker vi klimatkatastrofen : lösningarna vi har och genombrotten vi behöver av Bill Gates på Bookis.com](#) Here you can also sell your old books!

Our motto: We can make a difference!

I'll be back!

Katja
