

Zebrafish core facility Karolinska Institutet, price list 2025

Item	price	explanation
Montly user fee	To be paid for each month any service of the zebrafish core facility is ordered	3 675 kr Covers running costs, consumables, repairs and depreciations for facility equipment
Holding tank fees	Rearing tank, per month	263 kr for zebrafish < 11 weeks (during rearing)
	Colony tank, per month	158 kr for zebrafish > 11 weeks (adults)
	single-housing tank, per fish	32 kr for single housed animals. Includes daily inspection and feeding, distribution and sexing of fish, cleaning of tanks and racks.
Embryo fees	incross: 100-300 embryos	630 kr
	incross: 301-600 embryos	1 260 kr
	Incross: 601-1000 embryos	2 310 kr
	Incross: 1001-1500 embryos	2 625 kr
	Outcross: one pair	158 kr including fin-clip for safe identification of individuals
	Testbreeding, incross	331 kr up to 7 mating tanks are set up, no embryos are collected.
Fees for embryo handling	Sorting, per 100 embryos	105 kr
	Screening for fluorescent marker, per 100 embryos	273 kr
	Manual chorion removal, per 100 embryos	273 kr
	Surface disinfection, up to 2 lines	893 kr
	Surface disinfection, 3-4 lines	1 260 kr
Fin-clipping and genotyping fees	Preparation genotyping, flat fee	420 kr Includes preparation of animals and fin-clipping bench, cleaning and disinfection after finishing
	Fin-clip, per fish	21 kr Includes anesthesia, fin-clip, collection of fin in tubes (if needed), inspection of animals until fully recovered

Tattooing, injections, gavage or other surgical procedures	Preparation surgical procedure, flat fee	420 kr	Includes preparation of animals and bench, cleaning and disinfection after finishing
	Surgical procedure, per fish	37 kr	Includes anesthesia, surgical procedure, consumables for procedure (e.g. tattoo ink, needles etc) inspection of animals until fully recovered

Regeneration of strains	Through incross, per strain	1 365 kr	Following the facility SOP for minimizing genetic drift
	Through outcross, per strain	1 995 kr	Following the facility SOP for minimizing genetic drift
	Cryopreservation, per strain	1 680 kr	Includes consumables, freezing of 10 samples per strain and test-IVF for quality control
	In-vitro fertilization, per strain	1 890 kr	Includes consumables, IVF of one strain including sorting and bleaching of min 30 and max 200 embryos.
	Liquid nitrogen storage, per line cryopreserved		current price for LN2, ca 110 kr/line/year

Animals	Juveniles < 11 weeks, non sexed	13 kr	
	Adults > 11 weeks, sexed	63 kr	
	Packing fee for shipping	368 kr	Styrofoam box, fish transport bags and time to pack fish

Consumables	E3-medium, 50x, 1 liter	236 kr	working time + price of chemicals
	96-well imaging plate with agarose bed	368 kr	working time + current price of supplier
	Air-permeable seal for imaging plate		current price of the supplier
	Fish feed, different particle sizes		current price of the supplier
	Health monitoring per sample		current price of the supplier
	Other consumables		current price of the supplier

Late cancellation policy	Services cancelled less than 24 hours before delivery will be charged with 50 %.
