Rafael's lectures - he is really keen on transmitting not only knowledge but a way to relate to these issues. These lectures also contained the most important information. I also liked the lectures explaining the history of vivisection and the animal rights movement and statistics -they both offered valuable historical insights.

The teachers were very knowledgeable and gave excellent informative lectures on the topics, especially those from outside of Sweden.

Excellent discussions all the time between speakers and participants

Experimental design & statistical analysis. MF PREPARE and ARRIVE: planning and reporting animal experiments. Systematic reviews of animal studies

I like the lecture for animal experiment and statistic design very much!
