

## **ATTACHMENT 2: PRICES**

Consumables and reagents (media, inhibitors, uncouplers, drugs used to interfere with metabolism) can be provided by the core facility.

For users which run the experiment without help:

XF96 Spheroid Plates: Cartridge included **1750 Kr/run (SRP 1500 Kr/run)**

XF24-96: Cartridge included **1200 Kr/run (SRP 950 Kr/run)**

Cartridge excluded **650 Kr/run (SRP 400 Kr/run)**

Cell or organoids count for data normalization using BD pathway multiplate reader **800 Kr** (normalized in the seahorse file)

For other services (trainings/analysis/project setup, etc.) **1000 Kr/h (SRP 800Kr/h)**

Introduction **800Kr/research group** (one time service)

For usage of cell culture, large amount of consumables and reagents, yearly usage, or to define the project costs ask for quote. Using multiple services of the above mentioned or running several experiments might be discounted.

Prices are shown without INDI costs (Approx. 23%).
