

The Neo-ACT trial

Newsletter no. 2, April 2023

Jana de Boniface, Cecilia Ringborg, Renske Altena and Yvonne Wengström

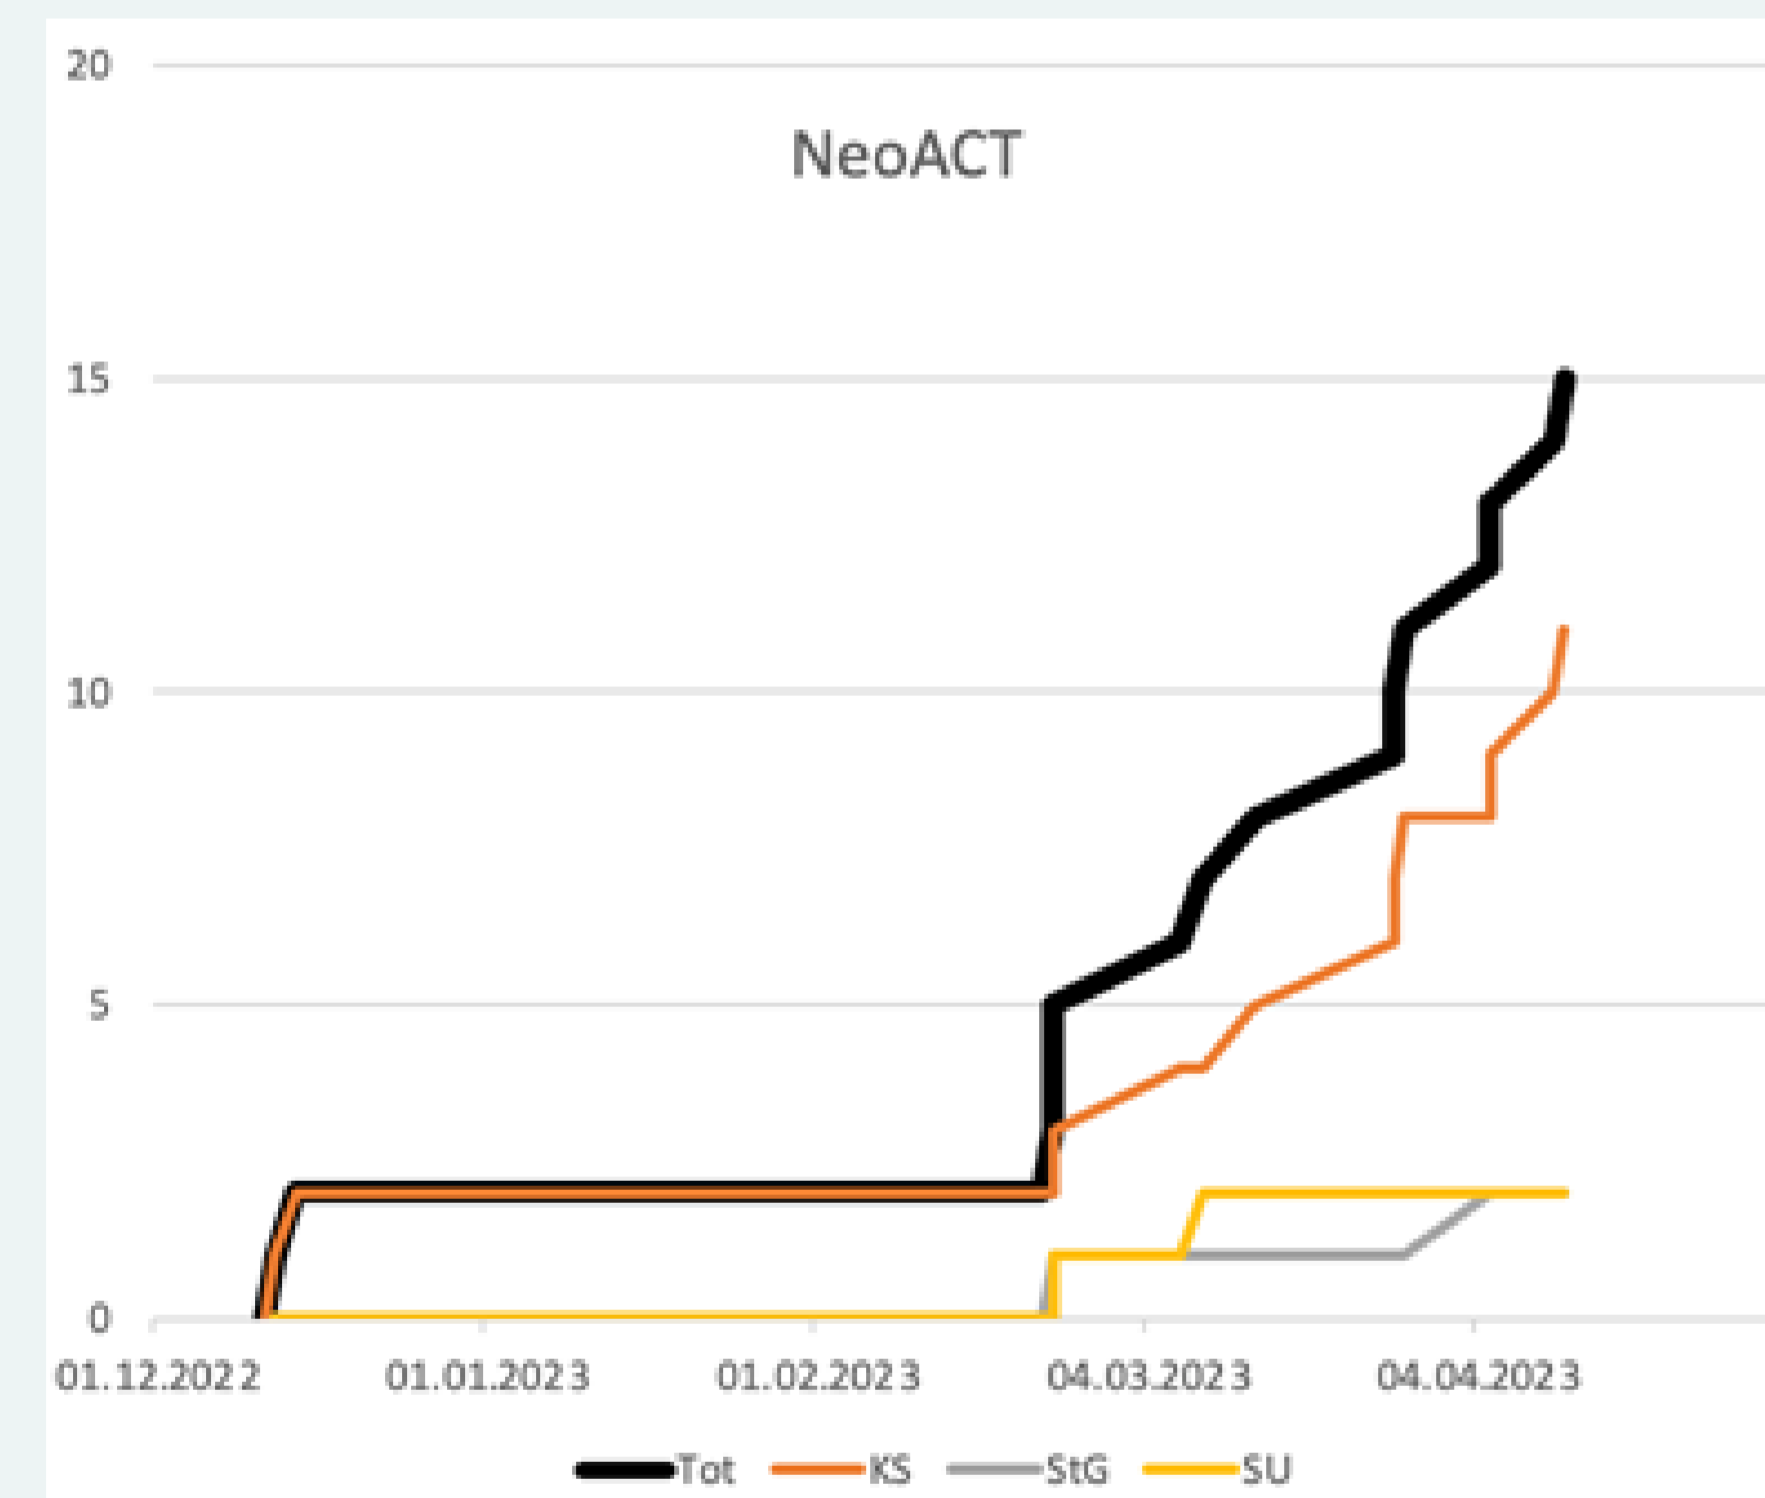

Inclusion is up and running!

We have now included 15 patients in the Neo-ACT trial at the open trial sites Karolinska, St Görän and Sahlgrenska.

Furthermore, Skaraborg, Umeå, Västerås and Sundsvall have had their site initiation visits and we are looking forward to their first patients.

Stockholm Southern Hospital and Helsinki University Hospital in Finland will start enrolment in the coming weeks.

Weekly meetings

Weekly meetings with Cecilia will be re-scheduled starting from May 10; the new time will be Wednesdays at 11:30 am. The aim of these meetings is to provide physiotherapists with support and practical advice during the enrolment period. You can find the Teams link on the Neo-ACT homepage.

Mobile app Vitala

The app will be updated in the coming weeks with new functions such as reporting the intensity of the work-out. Also, the patients will be able to report if they have done any other exercise than the exercise in the app. New manuals will be published on our homepage.

Homepage

For any purposes and needs, please visit our trial homepage, continuously updated with all necessary links, documents and information. You will even find a link to our free-access protocol publication and additional material to display in your waiting room in the clinic.
