Invitation to nominate candidates for the Karolinska Institutet Prize for Research in Medical Education (KIPRIME) 2026

On behalf of Karolinska Institutet, I have the honour to invite you to nominate candidates for KIPRIME 2026. The Prize is awarded for outstanding research in medical education. The purpose of the Prize is to recognize and stimulate high-quality research in medical education, thereby promoting long-term improvements in educational practices. 'Medical' includes all education and training within any health science profession. The Prize is made possible through financial support from the Gunnar Höglund and Anna-Stina Malmberg Foundation. You can get more information about the Prize, the Foundation, and the nomination procedure at [the Karolinska Institutet Prize for Research in Medical Education](#)

Note! Previous nominees need to be nominated again to be included in the selection process.

To be considered for the Prize in 2026, your nomination(s) must have reached the Scientific Secretary of the Prize Committee, Professor Terese Stenfors (terese.stenfors@ki) **no later than 10th of September 2025**. The Prize Committee is very interested in receiving nominations from expert institutions like yours. You are welcome to forward this invitation to colleagues who have specialized knowledge in the field of research in medical education. Please read the guidelines (also attached to this message).

Thank you for nominating a researcher, who by their distinguished work makes important research contributions to progress in medical education.

Yours sincerely,

Anna Kiessling,

MD, PhD, Professor. Chair of the Karolinska Institutet Prize Committee

Karolinska Institutet Prize for Research in Medical Education (KIPRIME) 2026

General information

The purpose of the KIPRIME is to recognize and stimulate high-quality research in medical education, thereby promoting long-term improvements in educational practices. 'Medical' includes all education and training within any health science profession. Nominees shall have made outstanding, and internationally recognized, contributions to research in medical education. Your nomination(s) may be based on not only studies made in a health science setting, but also on other research relevant to medical education. The nominee's findings must have been published in internationally and generally available journals or books. All key publications must be available in English. Read more at [the Karolinska Institutet Prize for Research in Medical Education](#).

Guidelines for nomination

Nominations are accepted from anyone interested in the field of research in medical education. To be considered for the Prize in 2026, your nomination must have reached the Prize Committee **no later than 10th of September 2025**. Nominations received will be confirmed by e-mail to the nominator.

Note 1: We will only consider new nominations or updated nominations from previous period. This implies that that we will not consider older, not updated nominations.

Note 2: We will not accept joint nominations. Each nominated person will be assessed individually. However, the Prize can be shared between two individually nominated persons.

Practical information

- Write your nomination as a text document.
- Save it in one of the following formats: Word or PDF.
- Send it by e-mail to: terese.stenfors@ki.se
- If you are nominating several nominees: Send a separate nomination for each nominee.

Nominator

State your name, title, and professional position, address, e-mail, and telephone number. The Prize Committee may contact you for further information.

Nominee

State the nominee's name, title, and professional position, address, e-mail, and telephone number.

Motivate your nomination (maximum five pages) by describing:

- The nominee's most important research findings.
- The relevance of the findings, either for medical education in general or for a specific field within health sciences education.
- Impact of the nominee's research results on educational practice and/or studies by other researchers.
- References for up to ten key publications within the field of medical education with the nominee as a principal investigator.

General

- Swedish regulations stipulate that nominations are public, but please use the information restrictively.

To submit your nomination or for further information, please contact

Professor Terese Stenfors

Scientific Secretary of the Prize Committee
