## Definitions

<b>Concept</b>	Conception of the research idea, formulating the hypothesis, developing the research question.
<b>Design</b>	Planning of the methods, measurements and analyses required to produce results.
<b>Supervision</b>	Oversight and responsibility for the organization and course of the project and/or the manuscript. Training and supervision in skills vital to the project.
<b>Resources</b>	Financing, personnel, equipment and space vital to the project.
<b>Material</b>	Providing subjects, patients, or stimulus material.
<b>Data collection/processing</b>	Responsibility for executing experiments, scheduling subjects or patients, organizing and documenting.
<b>Analysis/interpretation</b>	Responsibility for conceiving, developing and/or executing data analysis.
<b>Literature search</b>	Responsibility for literature overview/background.
<b>Writing</b>	Responsibility for creating all or a substantive part of the manuscript.
<b>Critical review</b>	Reworking the manuscript with intellectual content before submission, not just spelling and grammar checking.
<b>Other</b>	Other novel contributions necessary for completion of the project.
