

The Nordic SBRT study group meeting 5-6th of February

We are happy to welcome you to Stockholm for the yearly meeting of the Nordic SBRT-study group. The meeting will take place at **Karolinska University Hospital on the 5th-6th of February 2026**.

We will discuss ongoing and planned SBRT-projects as well as clinical experiences from different centres. We have an interesting program which will adhere to last year's meeting (follow-up on SBRT of bone metastases, new results from the ongoing studies on pulmonary central tumours, first results from the combination of SBRT and immunotherapy and more). We will also discuss new topics including novel imaging modalities, translational studies in relation to ongoing SBRT-research, adaptive workflow and more.

Registration for the meeting

Please use the link below to register for the meeting. In order to plan conveniences such as meals and coffee, we need your registration **by the 18th of December**. The number of places is limited and the registration will be based on a "first come first served".

[Link to registration to the meeting](#)

If you want to present or discuss a topic or a clinical SBRT-related issue, there are still a few slots available (15-20 minutes). Please contact Karin Lindberg (karin.lindberg@ki.se) in that case.

Accommodation and travelling

Accommodation and travelling needs to be paid by each participant individually.

If you have any questions, please contact your country representative and Karin Lindberg.
