PUBLICATION RELEASE & CLEARANCE CERTIFICATE AUTHORIZATION FORM INDIVIDUAL

To be completed by the primary national author/contributor

All lead authors/contributors from contributing nations or NATO Bodies, must obtain the necessary clearances before submitting their contribution for publication by the STO or before presentation at a STO event. These clearances may relate to security, proprietary or industrial rights and/or copyright, and are required for all contributions to STO activities. National requirements for clearance may vary. It is the responsibility of the contributor to comply with relevant national regulations and to ensure that an appropriate national authority signs this form, if necessary. Specific rules apply to authors affiliated with Australian or United States organizations/institutions – see Section 4.

Note that for research symposia and research specialist's meetings, such clearances merely provide the STO with the right to publish and distribute the manuscript and associated presentations; they do not constitute a transfer of copyright, as this will always remain with the originating author.
