

Price list KI Biobank Sample services, 2023

Effective as of 2023-03-01

Service	Price
Start of new studie	
Consultation, logistic planning, agreements, referral design and IT integration (<i>standard: 25 hours per study</i>)	25 000 SEK
Additional time	1 000 SEK / h
Referrals	
Printing cost	6 SEK / referral
Referral design and modification of existing referrals	1 000 SEK / h
Sampling at KI Biobank	
All ordinary sampling tubes	260 SEK
Sample deposition in 96 format	
<i>Includes registration, single centrifugation, aliquoting and freezing</i>	
Aliquoting from primary tube to $\leq 8 \times 225 \mu\text{L}$ in micro tubes	98 SEK / primary tube
Aliquoting from primary tube to $\leq 16 \times 225 \mu\text{L}$ in micro tubes	133 SEK / primary tube
Sample deposition in cryo tubes	
Per primary tube	98 SEK
Per aliquot (500 μL or 700 μL)	12 SEK
Sample deposition with double centrifugation	
Per primary tube	133 SEK
Per aliquot if aliquoting to cryo tube or similar	12 SEK
Direct freezing of sample tubes	12 SEK / tube
DNA Extraction	
<i>The price includes UV-measurement of concentration</i>	
From 400 μL EDTA whole blood (including aliquoting to 2 back-up samples)	104 SEK
From 4 mL EDTA whole blood	306 SEK
From Oragene™ kit	207 SEK
From buccal swabs	202 SEK
Administration fee for external DNA extraction customers	4 600 SEK
<i>Includes agreements, IT, instructions and validation</i>	
Cryopreservation of viable cells; PBMC	1 725 SEK / prep

Cell Free DNA Protocol	Price
Cell Free Plasma From STRECK or 10 mL EDTA	144 SEK / tube
Blood cells From STRECK or 10 mL EDTA	156 SEK / tube
Trombocyt free plasma From 10 mL EDTA	294 SEK / tube
Trombocyt suspension from blood From 10 mL EDTA	265 SEK / tube
DNA-extraction from blood cells From STRECK From 10 mL EDTA	207 SEK / tube 196 SEK / tube
Debris-free urine From 50 mL urine	282 SEK / tube
Isolated urine micro vesicles From 50 mL urine	564 SEK / tube
Cell suspension from urine From 50 mL urine	253 SEK / tube
<u>Package prices</u>	
Platelet Free Plasma & Platelet Suspension From 10 mL EDTA	426 SEK / tube
Debris-Free Urine & Isolated Urine Microvesicles From 50 mL urine	575 SEK / tube
Debris-Free Urine, Isolated Urine Microvesicles & Platelet Suspension From 50 mL urine	828 SEK / tube

Service	Price
Storage	
Primary tubes, large; 6 – 10 mL (-80 °C)	4.60 SEK / tube / year
Primary tubes, small; 4 mL (-80 °C)	2.30 SEK / tube / year
Cryo tubes ≤ 1.8 mL (-80 °C)	1.20 SEK / tube / year
Cryo tubes ≤ 1.8 mL, liquid nitrogen (-180 °C)	14 SEK / tube / year
Micro tube, 0.9 mL (96-format; -20 or -80 °C)	0.60 SEK / tube / year
Micro tube, 225 µL (96-format; -20 or -80 °C)	0.35 SEK / tube / year
Filter paper (-80°C or room temperature)	5 SEK/filter paper/year
Rack in liquid nitrogen tank	14 742 SEK/ rack /year
Withdrawal	
Planning of withdrawal order <i>Includes validation of data files and samples before and after withdrawal, customer communication, preparation of transport, MTA and other agreements</i>	1 000 SEK / h
Sample picking	12 SEK / sample
Reformatting of liquid samples between different tubes and plate formats	2 875 SEK / plate
Copies	525 SEK / plate
DNA Normalisation	
From DNA in REMP300-tubes or cryo tubes	13 674 SEK / plate
Other lab work on demand	1 000 SEK / h

The price list is for academic scientists affiliated to Swedish universities and hospitals.

Corporate customers, please contact KI Biobank for a quotation.

The university overhead INDI (26.20 %) will be added to all prices.
