GUIDELINES FOR WORKSHOPS

➢ There are 5 groups each formed by 5 to 7 participants.
➢ The main objective of the workshops is to develop and then present a research proposal for a collaborative project about the development of a targeted cancer therapy.

The targeted cancer therapy could focus on a single agent or being a combination therapy, and could involve a known or a new target (a molecular target or targeting a specific pathway).

Your proposal can discuss one or more elements involved in the development of the targeted cancer therapy: from basic research studies to mouse models, preclinical and clinical studies.

➢ The proposal should include the following topics/headings:
  1. Aim and objectives
  2. Survey of the field/Background
  3. Project objectives
  4. Significance: relevance to cancer and novelty
  5. Project description (planned experiments, material and methods, etc.)
  6. Equipment and infrastructure
  7. Collaborations
  8. Ethical consideration
  9. References

➢ The PowerPoint presentation will be of 18 minutes followed by 12 minutes questions.
