Psykiska ohälsa, samsjuklighet och arbetsförmåga

Projektet syftar till att undersöka olika aspekter av arbetsförmåga hos individer boende i Sverige med psykisk ohälsa med eller utan somatiska sjukdomar. Projektet kommer att generera ny kunskap om exempelvis möjliga kohorteffekter, betydelsen av hälso- och sjukvård samt behandling och vad förändringar i regelverket för socialförsäkringen betyder för sambandet mellan psykiska besvär och sjukfrånvaro.

Studierna bygger på information från svenska rikstäckande register och är inom detta forskningsområde en av de hittills största populationsbaserade kohortstudierna med lång uppföljningstid.

Finansiellt stöd

Vetenskapsrådet, Institutet för vårdvetenskap och hälsa, Karolinska Institutet, KID-finansiering Karolinska Institutet, AFA Försäkringar

Projektmedlemmar

Ellenor Mittendorfer Rutz, docent, projektledare
Mo Wang, Med dr, Karolinska Institutet
Syed Rahman, doktorand, Karolinska Institutet
Thomas Dörner, docent, Medicinska universitetet, Wien
Jari Haukka, docent, Helsingfors universitet
Eva Vingård, professor emeritus, Uppsala Universitet
Jari Tiihonen, professor, Karolinska Institutet
Petter Tinghög, forskarassistent, Karolinska Institutet
Aleksander Perski, docent, Stockholms universitet
Kristina Alexanderson, professor, Karolinska Institutet
