

## Brown fat – of mice and men

### Sven Enerbäck, M.D., Ph.D.

Dr. Enerbäck is professor in medical genetics at the University of Gothenburg and the Söderberg Foundation's endowed chair in experimental medicine.

Dr. Enerbäck's research is focused on the molecular mechanisms that regulate adipose tissue differentiation and metabolism. His work has led to the identification and characterization of brown adipose tissue in healthy adults.

**Date:** Wednesday September 17th at 15:00

**Place:** Petrén lecture hall, Nobelsväg 12B

**Host:** Jorge L. Ruas, Department of Physiology and Pharmacology.
