

SRP DIABETES SEMINAR

An Epigenomic Basis for Metabolic Dysfunction: Changes Taken out of Sequence

Evan Rosen, Beth Israel
Deaconess Medical Center and
Harvard Medical School

Dr. Rosen's laboratory has been dedicated to the study of adipose tissue biology, with particular focus on epigenetic and epigenomic determinants of metabolism. Work from the Rosen lab has greatly contributed to our understanding of how transcriptional control of metabolism can affect different aspects of health and disease.

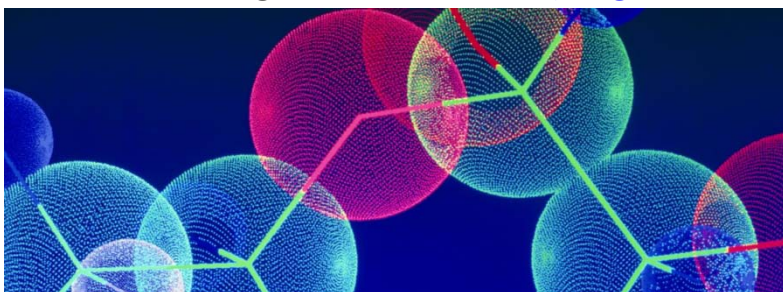

Date: Monday November 12, 2012 | 15.00 – 16.00

Place: Nobel Forum, Nobels väg 1, Karolinska Institutet

Host: Jorge Ruas / SRP Diabetes

After the seminar refreshments will be served, please register latest November 5 at [this link](#) or at ki.se/srp-diabetes

A “Meet the Professor event” with Dr. Rosen for PhD students and postdocs will be arranged by the MetEndo doctoral course program, contact jorge.ruas@ki.se for info.
