Join the KI Cancer Network for Colorectal Cancer Research

Date: 2015-06-05 | 09.00 am–03.00 pm
Venue: Lundqvist & Lindqvist, Västra Trädgårdsgatan 15 Kreugersalen, Stockholm

KI Cancer Network for Colorectal cancer (CRC) research is a new initiative with the aim to bring together basic and clinical researchers to build a creative environment with new ideas and collaborations in the field. KI is already today nationally leading in CRC research and there are many ongoing collaborations of high quality.

Still there is a great need to formalize this cooperation and strengthen the network further by forming a diagnosis based network that can take greater responsibility for driving the development, research and training in the field.

We have a unique opportunity to perform large randomized studies, running comprehensive clinical trials as well as large scale translational studies from bench to bed and back. The Network has financial support by the KI Cancer Program.

The first network meeting will be held the 5th of June 2015. Would you like to participate? Register by sending an e-mail to christina.edberg@ki.se, latest 25th of May

For detailed programme please see next page.

Welcome!

Anna Martling
Professor of Surgery, MMK
Coordinator, KI Cancer Network for CRC
Programme KI Cancer Network for Colorectal Cancer Research

Date: 2015-06-05 | 09.00 am – 03.00 pm
Venue: Lundqvist & Lindqvist, Västra Trädgårdsgatan 15 Kreugersalen, Stockholm

09.00 – 09.30 Coffee, "mingel"

09.30 – 12.00

Welcome, short introduction Anna Martling

KI Cancer and PCM Ingemar Ernberg

Colorectal Cancer - an update Anna Martling

Experiences from a working life within the CRC field Bengt Glimelius

ClinSeq project Henrik Grönberg

Colon Cancer Collaboration Group - Biological markers David Edler

Impact of vasculature and fibroblast-stroma on prognosis and response to treatment in CRC Arne Östman

Loss of tissue architecture in colon cancer Lars Holmgren

12.00 – 13.00 Lunch

13.00 – 15.00 (Coffee break during the session)

Adjuvant Low dose Aspirin in Colorectal Cancer, ALASCCA Anna Martling

SCREESCO - A Swedish national study as a roadmap to CRC screening Rolf Hultcrantz

The SYSCOL consortium: Systems Biology of Colorectal Cancer Jussi Taipale

Genetic predisposition and Prevention Annika Lindblom

Germline and somatic genomics of CRC Lauri Aaltonen

Is there a role for cytomegalovirus in colorectal cancer? Cecilia Söderberg-Naucler
- Possible implications for new therapy options

Summary of the day Anna Martling

How should we work together in the future?
Network structure?
New alliances?
