## §2 INFO: Experimentalist assignment procedures for BioMAX

To avoid BAG member friction, below is a reminder on how we assign experimentalists.

- a) The goal of "**§3 DECISION: Assign experimentalists**" below is to allocate experimentalists.
- b) Meeting participants are responsible for sharing the available beamtime, and determining who will start, share dewar shipping etc.
- c) Individuals absent from the meeting may receive beamtime as a courtesy from the assigned experimentalists in b) who reserve the right to refuse others from joining.

## §3 DECISION: Assign experimentalists

| Light source | Beamline | Date       | Duration | Start | Experimentalists |
|--------------|----------|------------|----------|-------|------------------|
| MAX IV       | BioMAX   | 2026-03-28 | 8 hours  | 08:00 | MM (3), AD (1)   |

Table 1. See also <http://ki.se/en/mbb/psf-mx>.

Please share sample information (UniprotID, heavy atoms, expression host) and approximate number of crystals asap after meeting.

Anatoly to share info on his protein.

## §4 INFO: PSF Phoenix robot out of order

Since 2022 our Phoenix robot has been controlled by a virtual Win7 machine inside a Win10 machine. This was to protect the Phoenix robot from rotating disk crashes and Win7 failure. Perhaps due to recent phasing out of Win10 we now cannot start the virtual machine since Friday 13 March... I have contacted KI IT-support that made the virtualization but have no prognosis on when the Phoenix can be up and running again but hopefully next week. Meanwhile bring a multichannel pipette and tips to prepare your MRC 96-well 3-drop plates prior to Mosquito run.
